Ad Manager BETA

[Help Center](#)

**Manage your online ad sales and inventory for free.**

Google Ad Manager is a hosted ad management solution that can help you sell, schedule, deliver, and measure all of your directly-sold and network-based inventory.

- **Simple, intuitive user interface:** Decrease training time and trafficking steps with simplified tagging and inventory management.
- **Google serving speed and reliability**  
Ensure quicker ad delivery and fewer reporting discrepancies.
- **Significant cost savings - it's free!**  
Pay nothing for ad serving, feature upgrades, or system maintenance.

**Take a Tour of Ad Manager**

**Received an invitation or already have an Ad Manager account?**

**Didn't get an invitation?**  
[Apply now](#)

Click this link if you're having trouble logging in.

## Your sign-in

To sign in to Ad Manager for the first time, enter your AdSense username and password. Once you've signed in, you can create new user accounts if you have Ad Manager administrative privileges. New users can then sign in to Ad Manager using their Google Account username and password.

## Creating accounts for new users

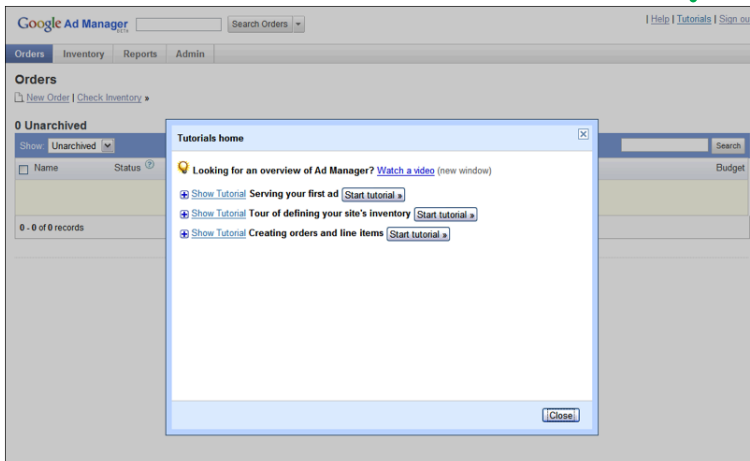

You can create new user accounts if you have Ad Manager administrative privileges. All Ad Manager users must have a Google Account. If you're adding users who already use one or more Google products (such as Google Mail, AdWords or Checkout), those users already have Google Accounts and won't need to create new ones. However, they can still choose to create a separate Google Account for Ad Manager.

## Accessing multiple accounts

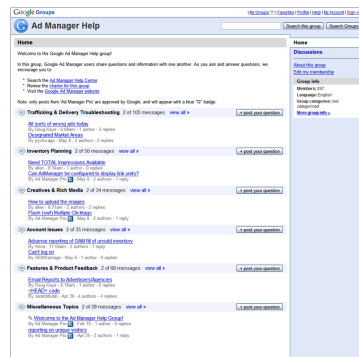

If your username is associated with more than one Ad Manager account, you will be prompted to select the account that you'd like to access when you sign in. You can also use the drop-down box at the top of your account page to toggle between accounts at any time.

## Getting Started:

Once you've signed in to Ad Manager, please review our Ad Manager tutorials. Just click **Tutorials** at the top of your account to start learning more.

To view all our Ad Manager reference information and training materials, visit the Google Ad Manager Help Centre, where you can browse our searchable FAQs, step-by-step guides and video tutorials. You can also join the Ad Manager Help Group to connect with other users and share any questions and comments, along with your own Ad Manager expertise.

**Tip:** Visit the Google Ad Manager Help Centre, your complete resource for all Ad Manager topics. Just go to [www.google.com/support/admanager/publisher](http://www.google.com/support/admanager/publisher)

# Defining Your Site's Inventory:

## Creating an ad slot

When you sign in to Google Ad Manager for the first time, you'll see the **Orders** screen. Before your ads can be delivered, you need to define your inventory. You can create inventory by clicking the **Inventory** tab. After defining your inventory, you'll see the Ad Slots screen.

In your Ad Manager account, click the **Inventory** Tab.

What are ad slots? Imagine printing a hard copy of your homepage and cutting out all the ads. Each empty space is an opportunity to advertise. Ad Manager defines this space as an ad slot, which includes a name, description and ad dimensions.

# Defining Your Site's Inventory:

## Creating an ad slot:

On the **Inventory** tab, click **Ad Slots**, then click **New Ad Slot**.

- A. Enter a name.
- B. Enter a size.
- C. Define a target window which identifies the browser window where an ad's landing page will open. Values include:

**\_top**: The target URL will load in the full body of the current window, breaking out of any potential framesets.

**\_blank**: The target URL will open in a new, unnamed window.

- D. If you'd like AdSense to fill unsold inventory or compete on price against your ad networks and remnant inventory, select the **AdSense** checkbox.
- E. (Optional) Enter a description.
- F. Associate the ad slot with one or more placements by clicking **Add»** beside the appropriate placements.
- G. Click **Save**.

The screenshot shows the 'New Ad Slot' form in Google Ad Manager. Annotations A through G point to specific fields and actions:

- A**: Ad slot name input field.
- B**: Size dropdown menu.
- C**: Target window dropdown menu.
- D**: AdSense checkbox.
- E**: Description input field.
- F**: 'Add»' button next to a placement in the table.
- G**: 'Save' button at the bottom.

Placement Name	Description	Ad Slots	Size	Add»
Homepage ROS	All ad slots on the homepage	3	160 x 600, 300 x 250 ...	Add»

**Naming Tip:** We recommend that you be as specific as possible when naming your ad slots, so that you can easily identify them and target them with your ad campaigns. For example, here's a very specific name for an ad slot:

**SiteName\_Section\_PagePosition\_WxH / MySite\_Homepage\_Top\_728x90**

# Defining Your Site's Inventory:

## Creating a placement

After you've created your ad slots, the next step is to associate your ad slots to one or many placements. A placement enables you to group ad slots that an advertiser might want to target. Say, for example, that you operate a news site. You might create one placement that includes ad slots for all skyscraper ads on your site.

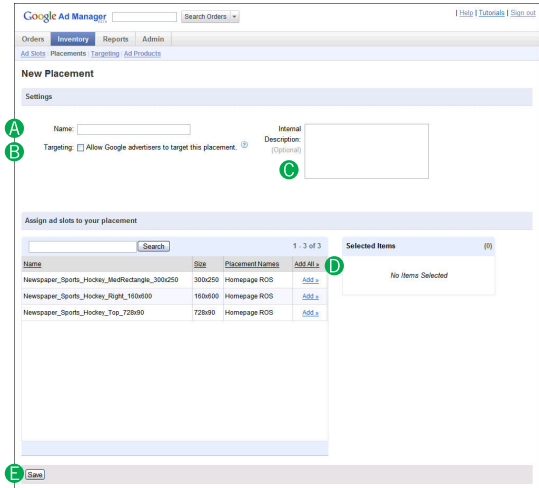

You might create another placement that includes all ad slots on pages containing content about sports. Both of these placements could include the ad slot for the skyscraper ad slot on sports pages. Other placements might include combinations of ad slots appearing in the world news, travel and weather sections of your site.

# Defining Your Site's Inventory:

## Creating a placement:

In the **Inventory** tab, click **Placements**, then click **New Placement**

- A. Enter a name.
- B. If you'd like to make your placement available for Google advertisers to target, select the **Allow Google advertisers to target this placement checkbox**.
- C. (Optional) Enter a description.
- D. Associate ad slots to the placement by clicking **Add»** beside the desired ad slot. (If an ad slot doesn't exist yet, you can complete this step later.) Each placement should include a unique combination of ad slots.
- E. Click **Save**.

The screenshot shows the 'New Placement' form in Google Ad Manager. It has a 'Settings' section with 'Name' (A), 'Targeting' (B), and 'Internal Description' (C). Below is a table of ad slots with 'Add »' buttons (D). A 'Save' button is at the bottom (E).

Name	Size	Placement Name	Add »
Newspaper_Sports_Hockey_MidRectangle_300x250	300x250	Homepage ROS	Add »
Newspaper_Sports_Hockey_Right_160x600	160x600	Homepage ROS	Add »
Newspaper_Sports_Hockey_Top_728x90	728x90	Homepage ROS	Add »

**Tip: Consider ad products.** Use ad products (defined as one or more placements + default pricing + default targeting criteria) to easily manage predefined slices of your inventory. Consider ad products as a time-saving power feature.

**Tip: Consider customised targeting.** Ad Manager provides native targeting criteria (such as geographic location and browser type), but you might also wish to define customised targeting criteria based on profiling data gathered by your own site (for example, age or interests).

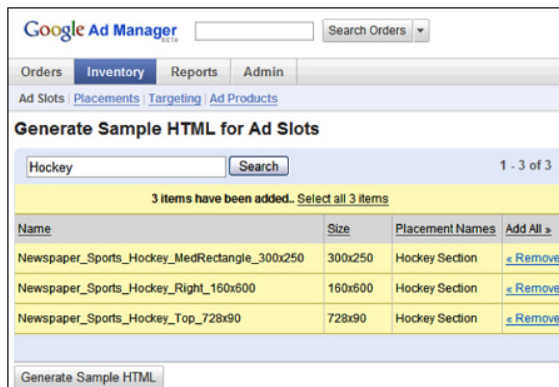

# Defining Your Site's Inventory:

## Generating ad tags

To link a particular ad slot with the desired page and location on your site, you'll need to introduce Ad Manager-generated code into the HTML of your pages

In your Ad Manager account, click the **Inventory** tab. Click **Ad Slots**, then click **Generate Sample HTML**.

The Ad Manager ad slot generator can automatically generate the HTML and JavaScript that is necessary to integrate one or more ad slots on a page. Using the ad slot generator is optional, but generally easier and less error-prone than manually rewriting code.

Cut and paste the generated ad tag into the HTML of your site.

Congratulations! Your inventory setup is now complete and you can deliver your advertising campaigns across your site.

# Creating Orders and Line Items:

## Creating orders

The Orders tab is where you'll probably spend the majority of your time in Ad Manager. From here, you can create and manage orders, upload creatives and check your available inventory.

When you sign in to Google Ad Manager, the Orders tab appears. An order represents an agreement between you and an advertiser for a particular slice of your inventory and most commonly maps to an insertion order, which outlines the details of an advertising campaign between a seller of interactive advertising and a buyer.

In your Ad Manager account, click the **Orders** tab.

If you're not sure if you have enough inventory to fulfil your campaign requirements, you might want to **Check Inventory** first to see if ad impressions are available to be reserved. If you're confident that availability isn't a problem, then you can skip the forecasting step.

Checking your inventory forecasts can provide useful insight, which can help you prevent overbooking or underselling. Please note that for any recently created ad slots where forecasting information is unavailable, you will be prompted to overbook any new orders until forecasting data becomes available.

# Creating Orders and Line Items:

## Creating a new order:

On the **Orders** tab, click **New Order**.

The screenshot shows the 'New Order' form with the following sections and callouts:

- Settings**:
  - A**: Order name: [text input]
  - B**: External ID: [text input]
  - Time zone: America/Los\_Angeles
  - C**: Flight dates: 3/1/08 [12:00 AM] 3/7/08 [11:59 PM]
  - D**: Billable party: ☒ Advertiser ☐ Agency ☐ Both
- User Assignments**:
  - Entered by: [text input]
  - E**: Trafficker: [text input]
  - Salesperson(s): [text input]
- Advertiser**:
  - F**: Advertiser: [text input]
- Agency (optional)**:
  - G**: Agency: [text input]
- Contacts (optional)**:
  - G**: Billing: [text input]
  - Media: [text input]
  - Other: [text input]
- Notes (optional)**:
  - G**: [text area]

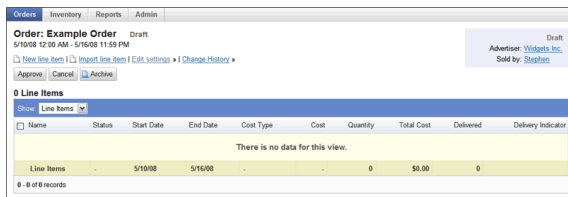

- A. Enter a name.
- B. For the optional external order number, you can use an invoice code or some other information for your reference.
- C. Enter flight dates, relative to the displayed time zone.
- D. (Optional) Enter the billable party, which may be an advertiser, an agency or both. This information is for your reference only and doesn't affect any billing processes.
- E. Select the Trafficker and Salesperson for the order.
- F. Enter an advertiser.
- G. (Optional) Enter an agency, contact information and notes.

# Creating Orders and Line Items:

## Creating line items

An order will contain one or multiple line items which you will be prompted to create after submitting an order. A line item specifies the details of the order and acts as the advertiser's commitment to purchase a specific number of ad impressions (CPM), user clicks (CPC) or time (CPD) on certain dates at a specified price.

A line item also specifies where an advertiser's ads will appear. A line item might also specify an ad's target audience and the frequency of when an ad may be shown.

The screenshot shows the Ad Manager interface. At the top, there are tabs for 'Orders', 'Inventory', 'Reports', and 'Admin'. Below the tabs, the 'Order: Example Order' is displayed in a 'Draft' state, with a timestamp of '5/10/08 12:00 AM - 5/16/08 11:59 PM'. There are links for 'New Line Items', 'Import Line Items', 'Edit Settings', and 'Change History'. On the right, it shows 'Advertiser: Widgets Inc.' and 'Sold by: Jonathan'. Below this, there are buttons for 'Approve', 'Cancel', and 'Archive'. The main section is titled '0 Line Items' and contains a table with columns: Name, Status, Start Date, End Date, Cost Type, Cost, Quantity, Total Cost, Delivered, and Delivery Indicator. The table is currently empty, displaying the message 'There is no data for this view.' Below the table, it says '0 - 0 of 0 records'.

Name	Status	Start Date	End Date	Cost Type	Cost	Quantity	Total Cost	Delivered	Delivery Indicator
There is no data for this view.									
Line Items	-	5/10/08	5/16/08	-	-	0	\$0.00	0	

In your Ad Manager account, click the **Orders** tab. Click **New Line Item**.

# Creating Orders and Line Items:

## Creating line items

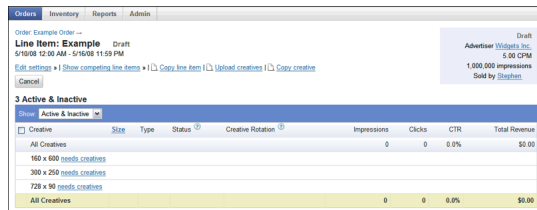

- A. (Optional) Select an ad product from the drop-down list and click **Import Ad Product** to pre-populate ad product and placement data.
- B. Enter a line item name.
- C. Enter the line item flight dates.
- D. Select the delivery priority (Exclusive, Premium, Standard, Remnant, House).
- E. Select the cost type (**CPM, CPC, CPD**)
- F. Enter the line item cost.
- G. Enter the line item quantity.
- H. (Optional) Enter the line item discount.
- I. In the Inventory section, click **Add»** beside any placement that you'd like to include in your line item.
- J. (Optional) Apply targeting criteria.
- K. (Optional) Under 'Delivery Rate', select **Evenly** or **As Fast as Possible**.
- L. (Optional) Select **Display Creatives** to show one creative per page, roadblocking or takeover.
- M. (Optional) Set a customised **Value CPM** to specify a CPM value that Ad Manager should use to determine the priority for ad delivery.
- N. (Optional) Select **Frequency** to limit the number of times that ads from a line item are served to any individual user.

The screenshot shows the 'New Line Item for Example Order' form. It includes sections for General information, Placements, Targeting, and Delivery Options. Various fields are highlighted with letters A through N, corresponding to the instructions in the list. The 'General' section includes fields for Name, Time Zone, Flight dates, Delivery priority, Cost type, Cost, Quantity, and Discount. The 'Placements' section shows a table with columns for Placement Name, Description, Ad Slots, Sizes, and an 'Add All' button. The 'Targeting' section has a link to 'Apply targeting criteria'. The 'Delivery Options' section includes fields for Delivery rate, Deliver Creatives, Value CPM, and Frequency. A 'Save' button is at the bottom.

# Creating Orders and Line Items:

## Uploading creatives

Now that you have determined when and where you wish to serve an ad, you need to associate the advertiser's creative with the purchased inventory. Line items usually include many ad slots, each of which may have one or more creatives, which are files or links that generate an ad (the terms "creative" and "ad" may be used interchangeably).

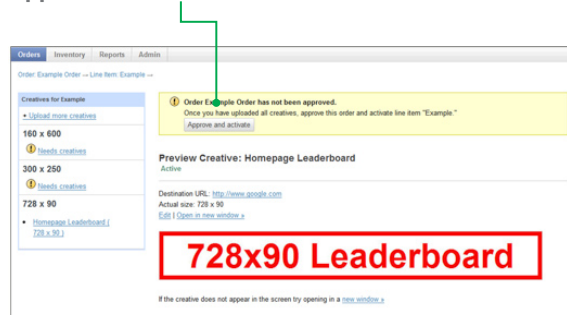

Creative	Size	Type	Status	Creative Rotation	Impressions	Clicks	CTR	Total Revenue
All Creatives					0	0	0.0%	\$0.00
160 x 600	needs creatives							
300 x 250	needs creatives							
728 x 90	needs creatives							
All Creatives					0	0	0.0%	\$0.00

In your Ad Manager account, click the line item where you'd like to upload a creative. Click either **Upload Creatives** or **Needs Creative** next to each size.

After selecting either **Upload Creatives** or **Needs Creative**, you will be prompted to enter a creative **Name**, select the **Ad Slot Size** and select the **Creative Type**. Ad Manager supports the following creative types:

- Flash file (hosted/redirect)
- Image file (hosted/redirect)
- Rich-media code (third-party tags and any customised HTML)

Once you have uploaded your creative, please review the creative, click **Approve and activate**.

Order Example Order has not been approved.  
Once you have uploaded all creatives, approve this order and activate line item "Example".  
[Approve and activate](#)

Preview Creative: Homepage Leaderboard  
Active

Destination URL: <http://www.google.com>  
Actual size: 728 x 90  
[Edit](#) | [Open in new window](#)

**728x90 Leaderboard**

If the creative does not appear in the screen try opening in a [new window](#).

Congratulations! Your ads are now eligible to be delivered to your site.
